EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Replace the status identifier of claim 21, "Previously Presented", **with** "Currently Amended".

2. The following is an examiner's statement of reasons for allowance. The present invention is directed to a copyright protection method and system utilizing two watermarks, one embedded into audio signals and the other embedded into video signals associated with the audio signals. More specifically, independent claims 1, 5 and 21 identify the uniquely distinct feature of overwriting only one digital watermark when both digital watermarks are to be updated; and independent claim 9 identifies the uniquely distinct feature as a video signal and an audio signal are allowed to be copied for one generation, a first watermark indicating that copying is not allowed for further generations is superimposed on the video signal, a second watermark indicating that copying is allowed for one generation is superimposed on the audio signal. The closest prior art, Epstein (6,490,355) discloses a system also using separate digital watermarks embedded in video and audio signals and a ticket accompanying the data transmitted;

however, when the copyright status of the digital data has been changed, another ticket is generated to reflect the change but the watermarks remain unchanged. Rhoads et al. (6,442,258) and Bloom et al. (6,332,194) discuss different ways of using digital watermarks to make changes in the copyright status of digital data including generating an additional watermark, using both a fragile watermark and a robust watermark and using only one watermark and modifying one of the bits of the watermark.

The prior art, taken either singly or in combination, fails to anticipate or fairly suggest the limitations of applicant's independent claim, in such a manner that a rejection under 35 U.S.C 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minh Dinh whose telephone number is 703-306-5617. The examiner can normally be reached on Mon - Fri: 9:00 am - 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barron can be reached on 703-305-1830. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
